SUMMARY

Full-stack developer and digital operations specialist with 3+ years of hands-on experience shipping ERP modules, modern web applications, and end-to-end automation workflows. Combines deep engineering skills (React, Next.js, Laravel, PHP, Python) with operational expertise in CRM platforms, funnel building, and AI-powered process design. Track record of delivering production systems for accounting departments, ecommerce operations, and service-based businesses across the Philippines and abroad. Cum Laude graduate driven by clean code, measurable outcomes, and continuous learning.

TECHNICAL SKILLS

Frontend: React, Next.js, Nuxt.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Vue, jQuery, Sass, Vite

Backend: PHP, Laravel, Node.js, Express, Python, FastAPI, WordPress, REST APIs, GraphQL

Databases: PostgreSQL, MySQL, MongoDB, Firebase, Supabase

Cloud & DevOps: AWS, Azure, Cloudflare, Vercel, Netlify, Docker, GitHub Actions, GitLab CI

Analytics & QA: Google Analytics 4, Google Tag Manager, Postman, Sentry

Tools: Git, GitHub, GitLab, VS Code, Figma, Notion, ClickUp, Slack, Google Workspace

PROFESSIONAL EXPERIENCE

Digital Operations Specialist · Service Web Studio

Feb 2026 – Present

Lead digital operations and web development for the agency's marketing side, connecting client-facing websites to the business systems and automations that run behind them.

- Handle end-to-end web development for the marketing-agency side, building and maintaining client-facing websites and supporting digital platforms
- Build and integrate business systems — ERPs, POS, and internal tools — to centralize operations, inventory, and reporting
- Design and deploy AI-powered automation workflows in n8n, Zapier, and Make, going deeper into automation to eliminate repetitive operational tasks across teams
- Manage ecommerce operations end-to-end: product listings, order processing, fulfillment coordination, and CRM-driven customer support
- Apply AI prompt engineering (Claude, GPT, Gemini) to generate content, internal documentation, and operational reporting at scale
- Coordinate cross-functional projects and track KPIs through digital reports that drive day-to-day decision making
- Author SOPs and onboarding documentation to maintain consistency as the team scales

Programmer Associate · Best Tools Group Inc.

Jul 2023 – Feb 2026

Mid-level developer on a small internal team building and maintaining the company's full ERP system.

- Architected and fully developed the in-house Ticketing Support System end-to-end, from system flow design through production
- Owned the entire Accounting module suite: Chart of Accounts, Journal Voucher, Transaction Journal, General Ledger, Service Payment Request, Pay Bills, Credit Bill, Enter Bill, Store Cash In, Purchase Order, and Banks
- Built the Shared API layer used across all ERP modules for cross-system data access and reuse
- Developed export functions in the Financials and Reports modules to support data analysts and consolidation review
- Enhanced and optimized the Job Order admin module for third-party job processing, improving backend performance
- Designed UI and front-end for the Web Ordering System; built internal automation pipelines using AI tools to accelerate development workflows

Freelance Web Developer · PH Web Dev Services / Independent

2019 – Present

Building custom websites, web applications, and business systems for local and international clients alongside full-time roles.

- Maintain and improve active production client sites: WebSamples.click, WE Partners Network ([wpn.websamples.click](#)), and Service Web Studio

- Build mobile-responsive, SEO-friendly sites using Next.js, Nuxt.js, React, WordPress, and Vercel/Netlify deployments
- Set up GoHighLevel workspaces, CRM pipelines, calendars, forms, and client communication flows for service-based businesses
- Design conversion funnels connecting ads, offers, forms, and follow-up sequences into complete client acquisition paths
- Earlier engagement at Enzalada Inc. (Mar – Oct 2023): UI design improvements and QA testing with structured issue reporting

SELECTED PROJECTS & WEB TOOLS

Public, live tools and demos available at jhgdp.netlify.app/tools

- Project Quote Estimator — interactive project pricing tool with downloadable PDF summaries
- Marketing Copy Generator — AI-powered copy generation across three ready-to-use variation styles
- VA Rate Calculator — hourly, weekly, and monthly pricing calculator for virtual assistants and remote services
- SEO Meta Tags Generator — clean meta titles, descriptions, and social preview tags for business websites
- Bio Writer — instant business owner bio generator without waiting on external AI APIs
- QIOSK (Undergraduate Thesis) — IoT-based queueing kiosk system deployed at STI College of Caloocan

EDUCATION

B.S. Computer Engineering · STI College of Caloocan

Jun 2019 – Aug 2023

- Graduated Cum Laude
- Thesis: “QIOSK: A Queueing Kiosk using IoT Technology for STI College of Caloocan”

Senior High School, STEM Strand · Holy Spirit Academy of Irosin

Jun 2017 – Apr 2019

- Salutatorian, Batch 2019

CERTIFICATIONS

- AWS Academy Cloud Foundations — Amazon Web Services
- Red Hat Training & Certification — Red Hat
- Huawei HCIA-IoT Course — Huawei
- Compute Cloud Services — Cloud Training
- PacketHacks Enablement Session — PacketHacks
